FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Full-Stack Developer with 2.5+ years of experience building scalable applications and implementing digital solutions using React, Node.js, and TypeScript. Proven track record reducing operational errors by 30–40% through process automation, service platform implementation, and hardware integration. Experienced in clean architecture, REST APIs, JWT authentication, and database design with PostgreSQL and MySQL. Cisco-certified in Ethical Hacking and Cybersecurity, with solid knowledge of network infrastructure and IT security. English proficiency: C1.

WORK EXPERIENCE

Full-Stack Developer & Administrative Assistant, China Harbour Engineering Company *April 2025 – Present*

- Developed, on own initiative, a full-stack digital weighing system integrated with industrial hardware, reducing operational errors by 40% through process automation and an optimized MySQL database.
- Implemented and optimized a MySQL database for operational data management, improving traceability, real-time data access, and integration with internal systems.
- Managed negotiations and contractual relationships with legal representatives of multiple supplier companies: Monte Sion (civil works on Route 32 roundabouts and segments, and sale of aggregates), Holcim (sale of cement), Colono (hardware materials), Breybre and Seaport (machinery), Albeya Roads & Solutions and Bela Consultores (road signage and pavement marking), and SOCIACO (customs processes).
- Participated directly in meetings with legal representatives of contractor and supplier companies within the Route 32 infrastructure project in Costa Rica.

FEATURED PROJECTS

Tickets Help Desk Platform — Full Stack *Demo: [tickets-tau-wheat.vercel.app](#)*

- Developed a full-stack ticket management platform with role-based access control (Admin, Agent, Client), change history tracking, and a real-time operational metrics dashboard.
- Implemented secure authentication using a dual-token JWT strategy (access + refresh in httpOnly cookies) and brute-force protection based on email and IP combination.
- Built a REST API using Node.js and TypeScript with a layered architecture, schema validation with Zod, configurable rate limiting, and integration testing with Jest.

Sleider Universe — E-Commerce Full Stack *Demo: [sleideruniverse.vercel.app](#)*

- Developed a full-stack e-commerce platform with secure JWT-based authentication, user management, and an administrative dashboard.
- Implemented a scalable architecture with clear separation of concerns (frontend, backend, database), following clean architecture principles using PostgreSQL and Prisma ORM.
- Built key features including shopping cart functionality, product and category management, and order processing.

EDUCATION

Post-Graduate Degree in Artificial Intelligence *In Progress*

Universidad Latinoamericana de Ciencia y Tecnología (ULACIT)

Bachelor's Degree in Systems Engineering (Graduated) *December 2025*

Universidad San Isidro Labrador (UISIL)

ADDITIONAL STUDIES

Ethical Hacker *Cisco Networking Academy*

Introduction to Cybersecurity *Cisco Networking Academy*

SKILLS

Programming Languages: *TypeScript, JavaScript, Java, Python, C#, SQL*

Frameworks & Libraries: *React, Node.js, Express.js, Tailwind CSS, Zustand*

Databases: *PostgreSQL, MySQL, Prisma ORM*

Tools & Technologies: *Git, GitHub, Postman, Vercel, Docker (basic), AWS*

Concepts & Practices: *Full-Stack Development, REST APIs, JWT Authentication, Scalable Architecture, Clean Architecture, AI-assisted Development, Scrum*

Networking & Security: *TCP/IP, DNS, DHCP, VLANs, Firewalls, Network Monitoring, Ethical Hacking*

LANGUAGES

English: *C1*

Spanish: *Native*
